

Big Shifts that Will Transform Planning, APA and Your Work

Joel Albizo, FASAE, CAE
Chief Executive Office
American Planning Association

INDUSTRIAL REVOLUTION

TRANSFORMING INDUSTRIES AND INNOVATION

Technology has exceeded our ability to adapt

By 2021 the number of devices with built-in AI assistants will exceed the Earth's population.

--American Society of Association Executives Foundation

"For Father's Day, I'm giving my dad an hour of free tech support."

Accelerating Technology

The image features a solid dark blue background at the top, which transitions into a white, textured foreground that resembles a snowy or sandy landscape. The horizon line is slightly uneven, suggesting a natural setting. The text 'Accelerating Technology' is centered in the blue area, and the number '1' is in the top right corner.

“We won’t recognize our profession in the next 10 years...and honestly, I said 10 years so it wouldn’t scare you. It will probably be unrecognizable in five.”

Mark Melancon
President and CEO
American Institute of CPAs

Evolving initial CPA licensure requirements to build a future-ready profession for a technologically driven marketplace

- Must adapt quickly due to the technological disruptions in areas such as data analytics, robotics, artificial intelligence and more
- Technological and analytical expertise are essential to performing assurance work, as well as the other services that are currently, or will be in the future, core to accounting.
- Sustaining the profession and continued public protection require rethinking initial licensure requirements
- **The profession must be redesigned** to attract individuals with technological and analytical expertise

“While no one technology will completely alter the architect’s role,...three technologies will have the greatest impact on the profession: **generative design**, **computational analysis**, and **automation**.”

--National Council of Architectural Registration Boards

Faster, cheaper more democratic medicine?

- Robotic drill reduces brain surgery procedure from 2 hours of complex hand drilling to 2.5 minutes
- Fewer infections, faster recovery and lower costs
- Democratizes health care
- Physicians guiding the process but not doing the work

--Neurosurgical Focus, University of Utah

PRESS RELEASES

AMA passes first policy recommendations on augmented intelligence

JUNE 14, 2018

“Combining AI methods and systems with an irreplaceable **planner** can address the delivery of **great communities** for all in a way that outperforms what either can do alone.

But we most forthrightly address challenges in the design, evaluation and implementation as this technology is increasingly integrated into **planners’** delivery of services to **communities, professionals and policymakers?**

CHICAGO — The... generated growin... novel challenges t... of medicine and a... policy addressing... stakeholders on th...

“As technology co... intelligence is use...

Jesse M. Ehrenfeld, M.D. M.P.H... Combining AI methods and systems with an irreplaceable human clinician can advance the delivery of care in a way that outperforms what either can do alone. But we must forthrightly address challenges in the design, evaluation and implementation as this technology is increasingly integrated into physicians’ delivery of care to patients.”

*A.I. Is Doing Legal Work. But
It Won't Replace Lawyers, Yet.*

James Yoon, a partner at Wilson Sonsini Goodrich & Rosati in Palo Alto, Calif., says people are willing to pay for his experience. "What clients don't want to pay for is any routine work."
Jason Henry for The New York Times

How is technology changing the way **planners** work?

- Data collection, analysis, monitoring, and evaluation (big data, crowdsourcing apps, drones, AI, sensors)
- Visualization (VR, AR)
- Community engagement (crowdsourcing apps, public engagement platforms)

Tools

Skillset

- Soft skills (repetitive work vs. experience-based decisions, facilitator and collaborator, public interest, problems first)
- Continuing education vs. continuous education
- New jobs for planners (AI data trainer, planning ethicist)

- Design thinking
- Agile methods
- Adaptive design / planning
- Testing and fail fast (sandbox vs. living lab)

Methodologies

Involved Disciplines

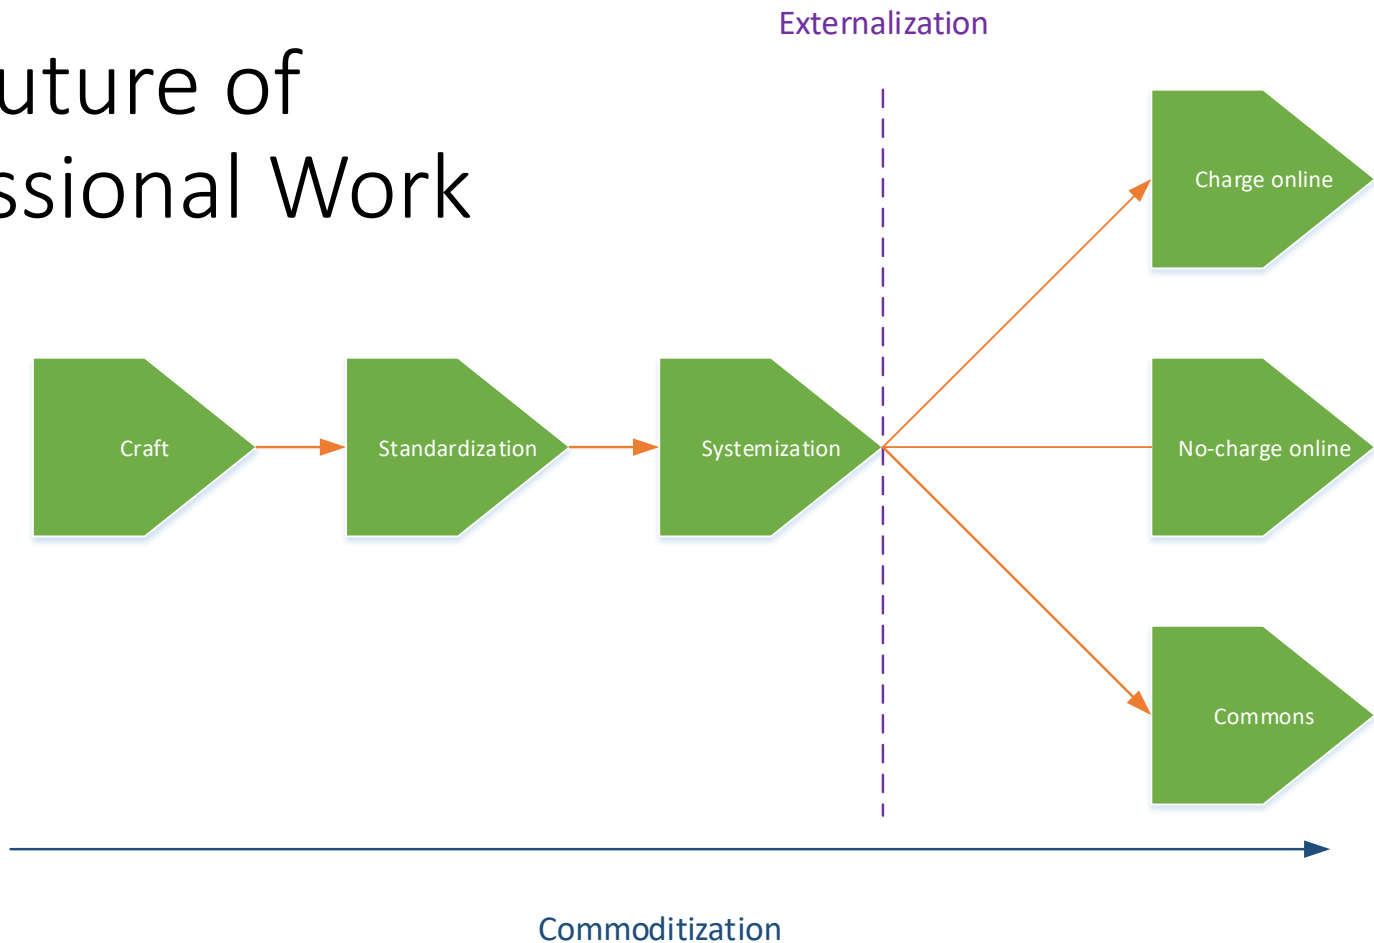

- ICT-experts
- Data analyst
- Data security specialist
- Digital inclusion manager

In the long run we will neither need nor want professionals to work in the way they did in the 20th Century and before

Increasingly capable machines, operating on their own or with non-specialist users, will take on many tasks that have been the historic preserve of the professions

The Future of Professional Work

Millions of Young People Shut Out of the Housing Market

Number of first-time U.S. home buyers below historical average

So far this year, first-time buyers represented about 38% of the market, greater than the historical average of 35%, according to Genworth. Some two million first-timers purchased homes last year, or 37% of the market.

“We’ve had a very strong surge in first-time home buyers,” said Tian Liu, chief economist at Genworth.

More and Better: Increasing Diversity, Equity, and Inclusion in Planning

Kendra L. Smith, PhD

As planners carry an important responsibility to society and communities, they influence how space is used and ultimately shaped. These designs are not always equitable and inclusive. Intentional institutional and structural changes by improved planning have made great strides, but as important as education, income, and family quality of life.

How that provides mentorship to youth for people's overall health and longevity. They have 2019-2020. One of the most significant ways to be demonstrated by the health of Detroit.

But a social issue: The ways in which cities have been designed play a critical role in this.

Overcoming old-school institutional and structural forces used to design cities requires new approaches to planning with intentional approaches to seeking diversity and inclusion (DEI). There are many ways to do this, but the primary—and perhaps the most effective—within the profession.

DEI in the urban planning profession grows beyond creating new roles of equity and actively working towards the planning field. How to be demonstrated by the health of Detroit.

Planning for Equity Policy Guide

2020 Delegate Assembly, April 14, 2019
Board of Directors, May 14, 2018

Urgency. Persistence. Patience.

Welcome to the Elements of AI free online course!

Join over 205,000 other people learning about the
basics of AI.

[Start the course](#) →

Are you wondering how AI might affect
your job or your life?

Do you want to learn more about what
AI really means — and how it's
created?

Do you want to understand how AI will
develop and affect us in the coming
years?

Becoming more strategic

Great Communities for All

Barriers

Speed of technological change

Low understanding/trust

Knowledge/skill uncertainty

Resistance to change

Lack of public infrastructure funding

AADA

Help planners anticipate and adapt to constant, often disruptive change and create outsized impact

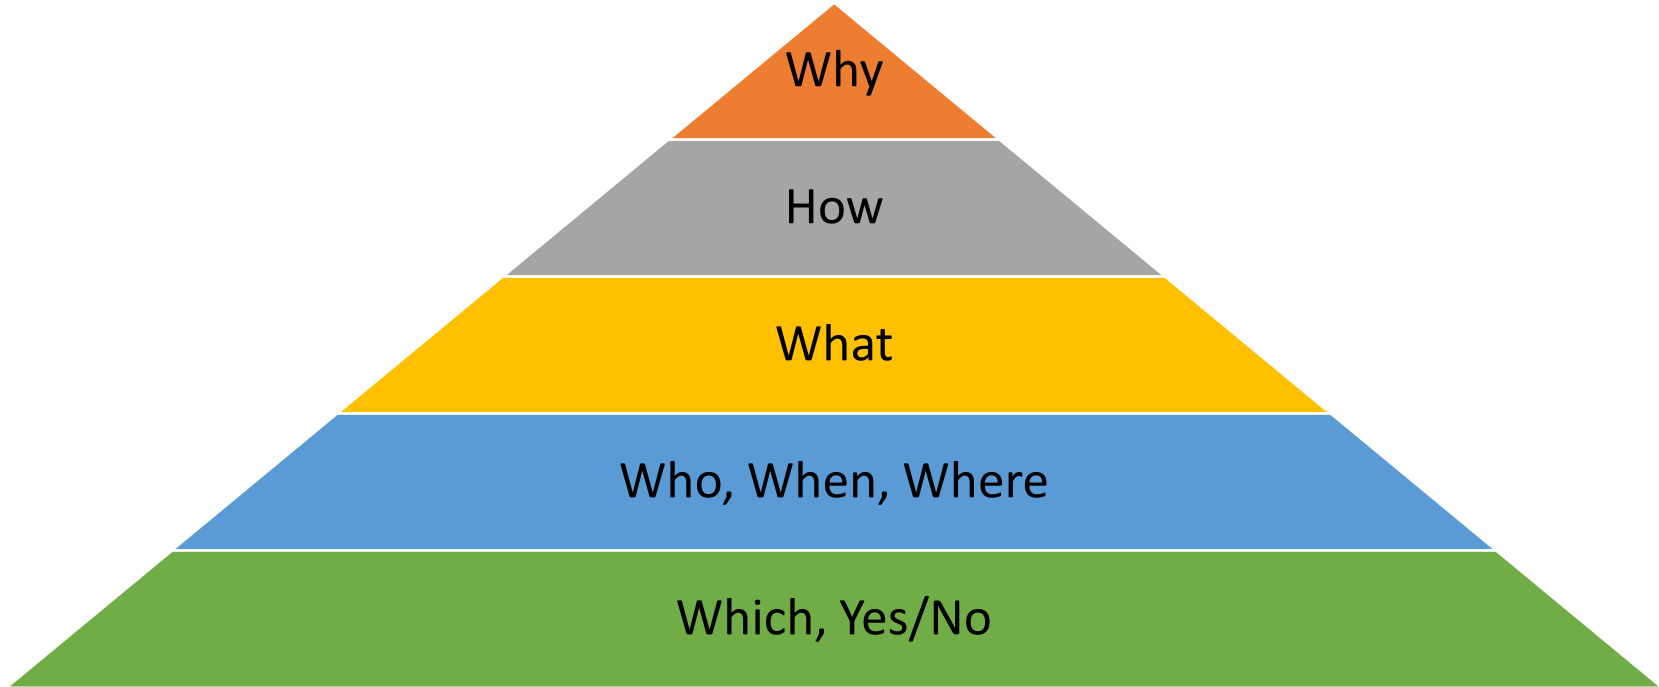

Thinking and acting differently

WE CANNOT SOLVE OUR PROBLEMS
WITH THE SAME THINKING
WE USED WHEN WE
CREATED THEM

-Albert Einstein

Ask more powerful questions

Use Design Thinking

FRAME A QUESTION

Identify a driving question that inspires others to search for creative solutions.

GATHER INSPIRATION

Inspire new thinking by discovering what people really need.

GENERATE IDEAS

Push past obvious solutions to get to breakthrough ideas.

MAKE IDEAS TANGIBLE

Build rough prototypes to learn how to make ideas better.

TEST TO LEARN

Refine ideas by gathering feedback and experimenting forward.

SHARE THE STORY

Craft a human story to inspire others toward action.

IDEO

What can YOU do?

#do1thing

- Learn about AI
- Try asking more powerful questions
- Experiment with design thinking
- Bring somebody different into the conversation or the team

Questions?
